

Java

```
class Solution {  
    public int sumOfPrimesInRange(int n) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number} n  
 * @return {number}  
 */  
var sumOfPrimesInRange = function(n) {  
  
};
```

TypeScript

```
function sumOfPrimesInRange(n: number): number {  
  
};
```

C++

```
class Solution {  
public:  
    int sumOfPrimesInRange(int n) {  
  
    }  
}
```

```
};
```

C#

```
public class Solution {  
    public int SumOfPrimesInRange(int n) {  
  
    }  
}
```

Kotlin

```
class Solution {  
    fun sumOfPrimesInRange(n: Int): Int {  
  
    }  
}
```

Go

```
func sumOfPrimesInRange(n int) int {  
  
}
```
